POLICY
on the identification, monitoring and protection of species listed in the red book

1. GENERAL TERMS

1.1. This policy has been developed for implementation at the Moscow State University of Food Production (hereinafter - MSUFP, the University).

1.2. The University takes responsibility for identification, monitoring and protection of species listed in the International Union for Conservation of Nature (hereinafter - IUCN) Red Book.

1.3. The University has developed a set of measures aimed at systematic monitoring of endangered species.

2. SET OF MEASURES

2.1. The Moscow State University of Food Production is actively involved in animal protection projects.

2.2. MSUFP is concerned with the conservation and growth of the Far East breeding spotted reindeer, which are listed in the Red Book. The work is carried out by teachers and students together with the employees of the Losiny Ostrov National Park.

2.3. The University studies the population in a limited area: it conducts monitoring, analysis and anthropometric measurements.

2.4. MSUFP volunteers work on the improvement and maintenance of the Losina Biostation; seminars, clinical status assessment and certification of the population of spotted deer are held.

2.5. The University conducts research to identify populations listed in the IUCN Red Book.
